

I-DENT  
EverClear 2

# I-DENT EverClear 2

To see what you are doing is critical to success, and for this, I-DENT announces the new EverClear 2 instrument. A high performance instrument for high precision dental procedures.

Indirect vision is a vital part of dentistry. EverClear 2 is a new, cordless, motorize dental mirror. The "spinning action" of the optically polished stainless-steel mirror means that indirect vision is never, ever, obstructed by fog, debris, tissue, and droplets of water or blood.

This revolutionary EverClear 2 is an economical purchase and a durable instrument investment. It is small and lightweight, with comfortable handling. The innovative internal technology features the latest in battery chemistry, combined with revolutionary micromotor engineering. The result is a Swiss quality instrument featuring exceptional reliability.

Easy to use and easy to maintain, the EverClear 2 is made for use with today's hygiene procedures, including Thermo-disinfection equipment. When seeing is believing, the new EverClear 2 is a sight to see.... with!

## CAVITY PREPARATION

Unclear indirect Vision (3-5 seconds)

EverClear Vision

## FEATURES AND BENEFITS

### Latest battery chemistry

Cordless operation with longer life, longer storage, and greater capacity for operating time

**Revolutionary micromotor design**  
featuring larger, more robust ball-bearings  
Reliability, durable

**Lubrication with standard high speed turbine oil**  
Easy to maintain

**Hygiene via Thermal Disinfection**  
Easy to clean

**Optically polished Stainless-Steel Mirror**  
Durable surface mirror with reflection accuracy (no double reflection)

**Double-sided mirror**  
2-in-1 mirror value

**All new mirror ejection system**  
Easy mirror replacement, no extra tools required

**Motorised Spinning Mirror**  
Constant, unobstructed indirect vision

### Optional Mini-Charging Station

2-in-1 storage and battery charging with small footprint

### USB recharging system

Ease of use, compact

## SWISS QUALITY AND VALUE

Located on the shores of Lake Geneva Switzerland, I-DENT quality is engineering products with reliability, durability, and performance. All with an elegant design, all to satisfy user's needs.

As a provider of products for dental professionals, as well as private-label devices, the I-DENT partnership features:

- 40 years of medical device experience.
- A history of innovative achievements in production methods and patented product performance.
- Reliable, European approach to customer service and the management of product development.
- Exceptional engineering competence with numerous technologies: Micromotors, Light emission and Optical design, Jet-stream, Shock wave, Lithotripsy and Ultrasonics.
- Swiss quality management in accordance with European Union legislation and regulations (ex. MDR), as well as ISO 13485 certified.
