

# New and still Revolutionary

A high-speed Swiss precision micromotor spins away spray and debris.  
Robust ball-bearings float a dual-sided, exchangeable mirror disk for permanent, stable image clarity.

**The EverClear™ dental mirror never needs cleaning because it always stays clean!**

# The new EverClear™ features

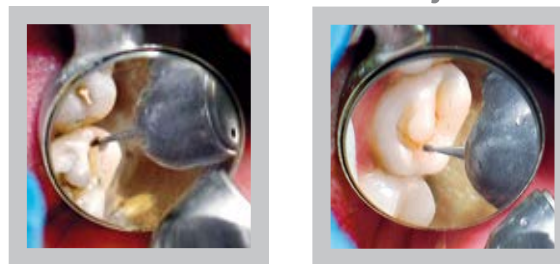

- long-lasting battery powers a high-speed, rotating, polished mirror that prevents particle adhesion
  - peerless, continuous crystal-clear image reflection
  - ergonomic non-slip grip in high-grade, medical stainless steel
  - continuous operating time of over 45 minutes
  - replaceable, double-sided, high optical polish mirror
  - completely steam sterilizable
- Head with mirror mount, replaceable mirror disc, and precision bearings
  - Quiet, stable micromotor powers an EverClear™ high-speed rotation
  - USB battery quick-charger
  - Rapid change of batteries
  - New easy quick-change system for rotor and mirror
  - Ergonomic, balanced, non-slip medical stainless steel handle

**Your Mirror**  
after 3 seconds      after 6 seconds

**EverClear™**  
after 3 seconds      after any seconds

Conventional dental mirrors require continual attention to remain clean... attention best focused elsewhere.

During typical operative procedures, 30, 40 or more interruptions are common— just to see what you're looking at. Concentration and control give way to eye strain, fatigue, stress, and a procedure lasting longer than necessary... you spend time cleaning, exchanging mirrors, or managing a dental assistant with spray instructions when space is already cramped.

The revolutionary I-Dent EverClear™ mirror eliminates the problem permanently. It never needs cleaning because it can't foul. Ever!

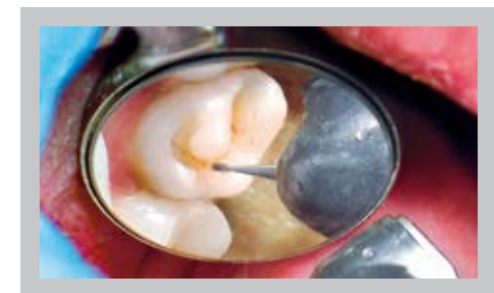

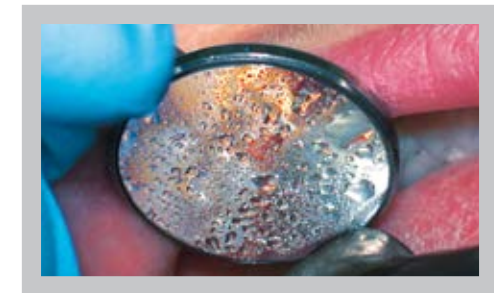

The key to this revolution in mirrors is high-tech Swiss precision micro technology.

# The EverClear™ advantages

How valuable is an uninterrupted focus on your patient? The answer is clear.

Both you and the patient will notice these EverClear™ advantages: less eye and back strain, fatigue, and loss of concentration as you...

- cut challenging preps confidently...
- finish restorations and ultrasound scaling while the EverClear™ spins debris and spray away for you.

What about efficiency and quality? Better preps in less time with continuous contours... greater work satisfaction.

Is spray control a problem? No longer. Apply spray as desired. The mirror stays cleaner, while the prep stays cooler.
