Engineering Excellence

I-DENT provides innovation and Swiss quality from the people with a tradition of engineering excellence. Beginning with the 1st titanium dental handpiece, this tradition produces new treatment value for medical devices with a variety of technologies. For example: Light emission and optical engineering, Ultrasonics, Jet-Stream, Shock Wave, Lithotripsy, Micro-motors. Our mission: to become the preferred provider of engineering services and manufacturing for private label equipment in the medical device industry.

At I-DENT, Swiss value is combining product quality with precision, performance, as well as the aesthetics of an elegant design... to satisfy end-users' needs. To this end, we have developed a number of OEM product concepts that feature the versatility to integrate new performance satisfying customer's requirements.

In addition, these OEM product concepts are proof-statements for the engineering results that customers can expect when I-DENT realizes their R&D product concepts.

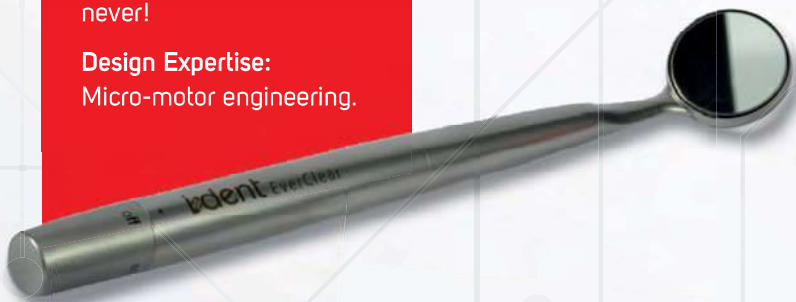

EVERCLEAR MOUTH MIRROR

Innovation:

Indirect vision that is never obscured by fog, debris, or water droplets... never!

Design Expertise:

Micro-motor engineering.

BATTERY POWER OPTIONS

Innovation:

Cordless option via proprietary rechargeable or single-use OTC batteries.

Design Expertise:

Power cell chemistry.

BLUE QUILL CURING LIGHT

Innovation:

The smallest, lightest, high power cordless curing light; Autoclave optional.

Design Expertise:

Blue and violet light emission.

Optical engineering.

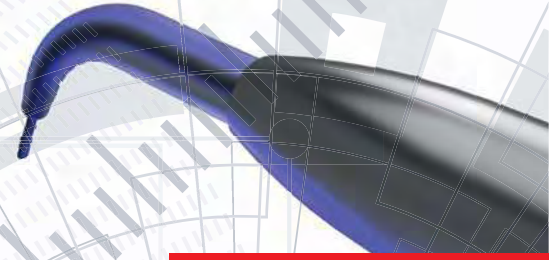

I-SEE

Innovation:
Bright transillumination
of the tooth.

Design Expertise:
Brilliant white light
emission.
Optical engineering.

BLASER

Innovation:
Smallest blue light laser
with a focus beam for
optimal depth of cure as
well as providing surgical
benefits.

Design Expertise:
Laser technology.
Optical engineering.

I-MIX CAPSULE MIXER

Innovation:
Silent operation. Dedicated or universal
capsule holder. Economical.

Design Expertise:
Centrifugal Engineering.

I-CONE ULTRASONIC UNIT

Innovation:
Piezo-electric ultrasonic unit with large internal
reservoir, with wired or wireless foot-control.

Design Expertise:
Ultrasonics.

SWISS QUALITY

On the shores of Lake Geneva, Switzerland, I-DENT is based in Nyon.

As an OEM and private label provider, the I-DENT partnership includes:

- 35 years of medical device experience: R&D, product development, and manufacturing.
- A history of innovative achievements resulting in new production methods as well as patented product performance.
- Reliable, european approach to R&D processes and project management.
- Exceptional engineering competence with numerous technologies, for example: Micro-motors, Light emission and Optical design, Jet-Stream, Shock Wave, Lithotripsy and Ultrasonics.
- Swiss quality management system compliant with: European Union legislation and regulations including but the Medical Devices Directive as required by the CE mark; Quality standards per ISO 13485 and applicable industry standards.
